---

Summary

iOS Developer with experience building SwiftUI and MVVM-based apps from scratch, and 5+ years as a systems analyst in fintech and healthtech. Passionate about clean architecture, testing, and delivering elegant, user-centered experiences. Focused on scalable app structure, maintainability, and long-term product value.
Eligible to work in the UK. No visa sponsorship required.

Skills

iOS Development — Swift, SwiftUI, MVVM, UIKit, XCTest, XCUITest, Combine, CoreData, Async/Await, REST
Tools & Collaboration — Git, Jira, Agile, Scrum, Functional Testing, CI/CD (GitHub Actions)
Other Tech — JSON, SOAP, Kafka, SQL, MongoDB, UML, BPMN

Experience

iOS Developer   Jul 2024 – Present
State Technologies Ltd, London, UK

- Built an iOS application from scratch using SwiftUI, MVVM, and async/await for a civic tech startup.
- Developed 20+ screens with navigation, and 50+ reusable UI components; integrated with 30+ REST endpoints.
- Implemented clean architecture to provide scalability and testability.
- Added GitHub Actions setup and initial unit test coverage with XCTest.
- Collaborated with product, backend, and design to scope features, align APIs, and handle async data flows.
- Prepared and submitted the app for App Store review; passed after refinements in response to feedback.

Senior Technical Analyst (Mobile Applications)   Apr 2021 – Sept 2023
Alfa-Bank / Investlab (through vendor, after company reorganisation in Nov 2022), Moscow, Russia
Top-3 Russian fintech company

- Contributed to architecture, delivery, and scaling of mobile investment apps used by 600K+ users.
- Designed REST integrations (mobile and API) and contracts for 6 APIs; delivered specs, UMLs, and edge-case flows for 6 complex and 10+ minor features; maintained 2 architecture docs.
- Aligned developers (iOS/Android/Java), QA, architects, product, and business to support feature development.
- Worked in Agile; facilitated planning, standups, PBRs, retros; demoed features to stakeholders.
- Maintained SQL queries and backend configs across dev/pre-prod environments, ensuring release stability.
- Interviewed 20+ analysts, onboarded 3 team members, and led 2 cross-team groups to improve delivery workflows.
- Key projects: bonus campaign automation, investment analytics, instrument search (ElasticSearch), alternative assets, MSA improvements.

Systems Technical Analyst   May 2019 – Apr 2021
BARS Group, Novosibirsk, Russia

- Contributed to a production-grade medical system used by all public clinics across 8 Russian regions.
- Gathered and analysed business requirements; wrote technical specifications for 2 new system features.
- Performed root cause analysis of bugs and tracked their resolution in collaboration with developers.
- Proposed and implemented improvements based on user feedback gathered through interviews.
- Conducted onboarding and training sessions for 3 junior analysts.

Earlier Roles

SAP Consultant, BDO, Krasnoyarsk, Russia — Budget reporting system support (Mar 2018 – Apr 2019)
Junior Analyst, Infocompas, Moscow, Russia — Ed-tech projects, support & testing (Jun 2017 – Jan 2018)

Education

Sept 2023 - Sept 2024 | MSc in Software Engineering (Distinction) — University of Westminster, London
Graduation project: London Explorer iOS App (SwiftUI, MVVM, REST, Java, PostgreSQL) — see GitHub

Sept 2013 - Jun 2017 | BSc in Computational and Applied Linguistics — Higher School of Economics, Moscow
